Met Office Aberdeen Meteorologist's View
Nothing extra

Forecast for Sunday 04 Apr 2021
Weather: Starting sunny but cloud spreading from the west in the morning. Some mainly light rain, with snow above 1000m, will develop later in the morning, with the odd short heavier burst mid to late afternoon bringing the snow level down to 600m. It will then briefly brighten up to sunshine but become much colder, then some heavy snow showers will develop in the evening, even down to low levels.

Maximum wind: WSW 30 gusts 40mph at first becoming westerly 45 gusts 70mph in the afternoon veering northwest in the evening decreasing 35 gusts 55mph.

Chance of cloud free mountain/hill tops above 800m: 80% at first falling to 20% in west and 40% in east.

Visibility: Good at first. Moderate, occasionally poor in rain and snow. Very poor in heavier snow showers in the evening but good away from these. Cloud bases: Little at first, becoming extensive at 600-900m the lower bases in west. Broken by late afternoon with occasional cloud to 450-600m in showers and some more persistent patches on higher tops.

Temperature: **Glens:** Around zero at midnight lifting to Plus 3 by morning, peaking at 8 in the rain then falling to around zero again in the evening.
At 800m: Plus 1, rising Plus 3 during the morning, falling to Minus 1 mid afternoon then Minus 5 in the evening.
Freezing level: 900m rising 1200m during the morning, falling 700m by mid afternoon then falling to all levels by dusk.
